- Sustainable chemistry routings

Supply Chain Evaluation Tool

Help SMEs to assess the likely viability of a proposed substitute chemical within a supply chain context

REACH SOLUTIONS THAT WORK FOR SMEs

REACH-SERV is an innovative new online service that has been launched to help medium and small manufacturers of chemicals throughout Europe. Its aim is to help such companies with:

- Compliance with the emerging REACH regulations, surrounding storage, manufacture and use of all types of chemical substances
- Migration towards alternative, more sustainable, manufacturing chains with lower REACH impact

The website is freely accessible and is run under the guidance of a pan-European grouping of chemicals trade associations including;

- CEFIC (pan Europe)
- CIA (UK)
- Essenscia (Belgium)
- FNCI (Italy)
- CIF (Finland)
- BACS (Europe)
- VNCI (Netherlands)
